

EUROPEAN SPACE TALKS BERLIN

18. November 2018, 18:30-21H, ZEISS Großplanetarium, SPACE CITY BERLIN #SpaceTalks

As part of the current Horizons mission with Alexander Gerst, a EUROPEAN SPACE TALK will be realized in Berlin together with ESA, DLR and other partner companies, where the content is concerned not only with the fascination for space but also with the symbiosis of science, arts and environmental education.

The EST2018 Berlin is a pilot event, and will take place four times in Berlin from next year 2019, and primarily address children and young people from the age of 6 with these topics.

At EUROPEAN SPACE TALK in Berlin's ZEISS planetarium, around 300 children and adolescents will be able to experience a sparkling stary night together with their parents or caregivers. A weightless experience to be permanently established by citizens of the SPACE CITY BERLIN for young Berliners.
